PROFESSIONAL SUMMARY

Computer Science graduate (COMSATS University, 2026) specializing in **ML-integrated systems** and full-stack development. Proven track record building **real-time computer vision pipelines**, edge-optimized deep learning models, and scalable event-driven applications. DeepLearning.AI certified (Machine Learning Specialization).

EDUCATION

BS, Computer Science · COMSATS University Islamabad, Pakistan

Sep 2022 – Jun 2026

TECHNICAL SKILLS

Languages & Frameworks: Python, JavaScript (Node.js, React, Socket.io), TensorFlow, Scikit-learn, Flask
ML & Computer Vision: YOLOv8, ByteTrack, MobileNetV2, SIFT/HOG, Cosine Similarity, Content-Based Filtering
Databases & Tools: MongoDB, Redis, SQLite, AWS, Docker, REST APIs, WebSockets, RTSP Streaming, OWASP
Core Foundations: DSA, OOP, Microservices Architecture, Event-Driven Systems, RBAC

EXPERIENCE

Machine Learning Intern · National Institute of Electronics (NIE) - Islamabad

Jul 2025 – Aug 2025

- Engineered and deployed a real-time Vehicle Re-ID system using YOLOv8 and ByteTrack, enabling reliable cross-camera vehicle tracking across dual live CCTV feeds.
- Optimized deep learning inference for low-power edge devices via MobileNetV2 and adaptive frame-skipping, sustaining stable FPS on live RTSP streams.
- Curated training datasets in collaboration with research teams; delivered production-ready Edge AI pipelines for real-time embedded monitoring environments.

PROJECTS

Advanced Vehicle Re-Identification System · NIE Research · Computer Vision / Edge AI

Jul 2025 – Aug 2025

- Architected a 3-tier Re-ID system with single-reference tracking, SQLite database indexing, and synchronized dual-camera CCTV monitoring.
- Constructed a hybrid feature engine merging SIFT/HOG classical descriptors with deep learning embeddings, achieving 95%+ cross-camera matching accuracy.
- Devised a conflict-resolution algorithm using Cosine Similarity and weighted ensemble scoring for unique vehicle ID assignment across camera views.

Sync - AI-Powered EdTech & Networking Platform · MERN Stack · Flask · ML Microservices

Jan 2025 – May 2026

- Built a scalable MERN-stack platform with full RBAC for Students, Teachers, and Organizations; leveraged Socket.io for real-time notifications and collaboration.
- Developed a Flask/Scikit-learn budget prediction microservice and a content-based filtering engine for intelligent team and project recommendations.
- Designed an AI applicant ranking system (skill-match scoring + historical metrics); integrated Tazapay API for escrow payments; hardened against OWASP Top 10.
github.com/HuzefaAbid/SYNC

VOLUNTEER EXPERIENCE

Campus Co-Leader / Vice Captain · AWS Student Builders Group, COMSATS University Islamabad

Oct 2024 – Jun 2026

- Progressed through **four leadership roles** (PR Head → Managing Director → Dep. President → Vice Captain) in 18 months; spearhead technical workshops, cloud innovation events, and community outreach as AWS-badged Vice Captain.

Director of Operations · CTS (CUI Tech Society), COMSATS University Islamabad

Apr 2025 – Jan 2026

- Oversaw planning and execution of technical events (workshops, hackathons, speaker sessions); managed internal operations and logistics to strengthen student engagement and build a connected tech community.

CERTIFICATIONS · DeepLearning.AI / Stanford Online / Coursera

- Advanced Learning Algorithms - Jun 2025
- Supervised Machine Learning: Regression & Classification - Feb 2025
- AI For Everyone - Jan 2025
